

Master of Data Science for Public Policy

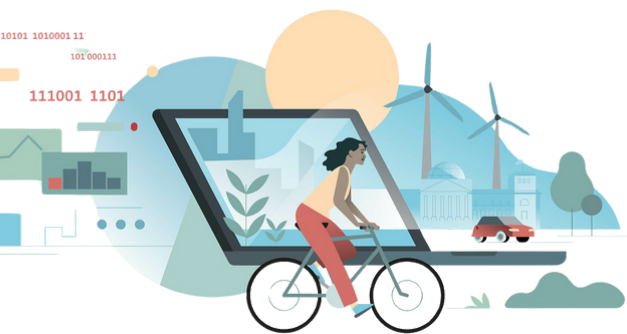

Turn data into governance solutions that transform challenges for the common good.

The Master of Data Science for Public Policy (MDS) brings together passionate students from both technical and social science backgrounds to deepen their analytical skills and develop an in-depth understanding of the policy world.

During this two-year master's you will learn how to leverage AI's transformative capabilities and data science-based decision-making to tackle some of the most complex challenges of our time.

Key facts

- 2-year, full-time, in English
- Career services, professional and alumni network
- Leading international faculty
- Qualifies for a job-seeking visa in Germany (up to 18 months after graduation)
- Accredited by German Accreditation Council

Apply by 1 May for a full scholarship: Data for Good Scholarship

The scholarship is aimed at students of all nationalities who are interested in using data and data science to address societal issues and to promote better informed policy-making.
